## **COVID-19: BEST PRACTICES FOR FAMILIES TO PREVENT INFECTION**

---

To assist you and your family in reducing the risk of COVID-19 infection, Graham Company developed these best practices: [click here](#). We initially developed and distributed these for our internal Graham employees. The positive response from our employees and their families was such that we felt this summary might benefit our clients as well. The best practices, while extensive, are not necessarily exhaustive and we encourage you to stay current with CDC guidance.

We hope you and your families are healthy and remain so. We are here for you. Let us know how we can assist you with your risk management and insurance questions.

For additional COVID-19 resources and risk management recommendations, please visit our [COVID-19 Risk Management Center](#).

A PDF of the above information can be found [here](#).
